

Our Team

Team work is the ability to work towards a common vision. For us coming together is the beginning, keeping together is progress and working together is success. An excellent management team and committed, qualified employees are the foundation of our success

Caring For The Environment

CEMENT

Cement (a finely ground inorganic material) is a hydraulic binder which, when mixed with water, forms a paste and sets and hardens by means of hydration reactions. After hardening, retains its strength and stability even under water.

Cement is a component of concrete and one of the most environment friendly of all building materials.

Cement consists of compounds of calcium oxide (CaO), silica (SiO₂), Alumina (Al₂O₃) and iron oxide (Fe₂O₃), while satisfying the requirements of the standards of strength and soundness

Hamriyah Cement Plant is not only designed to make the best use of green technology but is focused on becoming an environment management reference Plant in the regional cement industry. This is in line with the United Nations and UAE efforts in making the world a greener and friendly environment. Due to its hard work on this Hamriyah Cement Company has been awarded in the TOP 3 Company for 'green excellence' by Hamriyah Free Zone in the year 2011 - 2012

Continuing its endeavour in this direction a major breakthrough was achieved when the Company achieved the ISO for the following ISO 9001:2008 Quality Management systems, ISO 14001:2004 Environmental Management Systems in 2011 and OHSAS 18001:2007 Health & Safety Management system in 2012.
