

HAMRIYAH CEMENT COMPANY (FZC)

Hamriyah Cement Company (HCC) is a part of Bin Kamil investment Group, one of the leading business company in the United Arab Emirates. HCC Plant is located in Hamriyah Free zone Phase 2 Sharjah UAE, about 1.5Km from Emirates road between Ajman and Umm Al Quwain. The company has been set up with primary objective of producing and selling Ordinary Portland Cement (OPC).

The company entered into a contract with world known renowned cement plant manufactures to carry out design, engineering, procurement, manufacturing, erection, installation testing and commission at site. State of the art Cement Grinding plant, ecofriendly with full modern European technology, started full production of Cement in Bulks, Bags and Jumbo Bags on January 2009 with a minimum of 2750 tons per day Cement grinding. In addition to the UAE market, Hamriyah Cement is expanding its promising coverage in the GCC countries & Africa.

An excellent management team and committed, qualified employees are the foundation of our success. As a performance and result-orientated company, we place great value on the competence of our employees and management.

The company is among the few plant in the Middle East Asia equipped with machinery capable in producing Blended Cement. De-Dusting technology was introduced which eliminated the need for venting of air to atmosphere. The company is well equipped with Separator to improve particle size distribution achieving high quality, durability and higher strength to ensure customer satisfaction.

Hamriyah Cement Plant is not only designed to make the best use of green technology but is focused on becoming an environment management reference Plant in the regional cement industry. This is in line with the United Nations and UAE efforts in making the world a greener and friendly environment. Hamriyah Cement Company has been awarded TOP3 green excellence " by Hamriyah Free Zone in the year 2011 and 2012.
